WEB DESIGNING IN FOUR DAYS

THROUGH ONLINE TRAINING

BEST OFFER

Fast Web TRAINING

LEARN FROM HOME

MODULE 1

2 hours training | Rs 2,000

You will be able to make a simple website with multiple pages independently without the knowledge of HTML, Java, JSP, PHP or CSS.

MODULE 2

2 hours training | Rs 3,000

You will be taken to a little higher level of making websites with more dynamic and interactive contents.

MODULE 3

4 hours training | Rs 5,000

You will reach to a very high level and would be able to create beautiful websites with lot of automation using online tools. You will learn to host your websites online like a seasoned professional.

OUR METHODOLOGY

FAST WEB does not believe that you still have to be stuck with the age old methodology of learning programming languages in order to make websites. We are in the 21st century where most of the controls have been made easy through automation. We utilize these tools to train you to make websites without the knowledge of computer programming. We do not believe in fleecing the middle class and the poor by using technical jargon to project that you will be learning something unique against a high fee.

The trainer at **FAST WEB** is qualified from **Indian Institute of Technology (IIT)** and that is why the concept is no-nonsense, focused, fun filled and interesting. It brings out the hidden creativity from the eager brains.

There are three modules that take the training to the required skill, and you pay as you go.

REQUIREMENTS

Desktop or Laptop with Windows 10 and a mobile phone with Whatsapp with basic knowledge of operating a computer is required to undergo the training.

This training is not for Apple Mac users. We have a separate module for them. **The training is suitable for the age groups between 10 and 60 years**. Basic understanding of using M S Word would be helpful.

IS IT REALLY POSSIBLE TO MAKE WEBSITES WITH 2 HOURS OF TRAINING UNDER THE MODULE 1 ?

FAST WEB assures that a trainee would be able to make his websites after 2 hours of training under the MODULE 1. **FAST WEB** home based online training incorporates a small project that has to be independently completed without our help. Trainees who have completed the MODULE 1 always go for the MODULE 2, being impressed by the easy to understand methodology, and being able to make simple websites with just 2 hours of training. Our approach is unique and only one of its kind.

MODULE 1	MODULE 2 & MODULE 3
It covers the basics about the internet and how we get connected to the internet. The student would be shown samples to understand about web page design and its contents. Then the student would be taught to make the webpages step by step. After this the student would be making the web pages on his own and would also link few pages to make a complete dynamic website. The training is for two hours with homework, would involve a project wherein the student would independently make his small website without our help. This would give him confidence that he can now independently make websites and he will also feel the sense of achievement and pride. After this he would be ready for the MODULE 2	These modules are designed for those trainees who have successfully completed the MODULE 1. One cannot directly train for the MODULE 2 without getting trained under the MODULE 1. One cannot train under the MODULE 3 without completing the MODULE 1 and the MODULE 2. It is not possible to go for the advanced module without first completing the previous module because we gradually proceed step wise to the higher levels. This helps the trainee to grip the concept of web designing properly, step by step and gradually. Once he learns, he would never forget the concepts. He can keep on upgrading knowledge afterwards.
